

TULSI 2020

"I am running for president to serve the interests of the people – not the interests of the rich and powerful, Big Pharma, war profiteers, and foreign governments.

I will stop wasting your hard-earned taxpayer dollars on regime change wars, the new Cold War and nuclear arms race, and invest in Medicare for All, education, protecting our environment, and rebuilding our infrastructure."

A SOLDIER'S HEART

- First female combat veteran to run for president.
- Has served for over six years on the Foreign Affairs Committee and the Armed Services Committee where she's been intimately involved with sensitive national security issues.
- Served two tours of duty in the Middle East and is currently a Major in the Army National Guard where she has served for 16 years.

AS PRESIDENT, TULSI WILL

- Ensure all Americans get the healthcare they need through Medicare for All.
- Protect our environment; our air, land, water, and oceans.
- Stand up to bigotry, hatred, and violence against others because of their race, religion, or sexual orientation.
- End our longstanding foreign policy of carrying out regime change wars, work to end the new Cold War and nuclear arms race.
- Increase taxes on the richest Americans, big corporations, and Wall Street so that no one's life is ruined by a health emergency or student loan debt.
- Set aside partisan politics to implement the best immigration solutions for the American people.
